Introduction

Let's create our own heart charms using brick stitch technique with any colors Delicas! Top them with a wire guardian and jump ring for a unique and personalized charm.

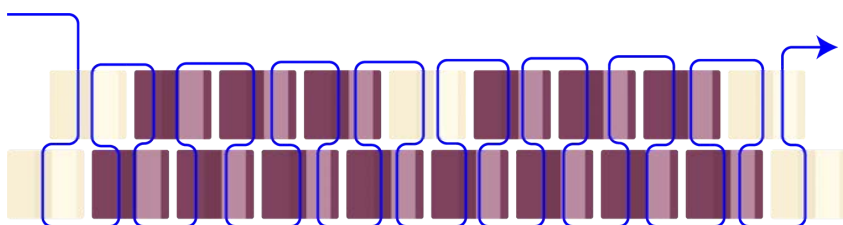

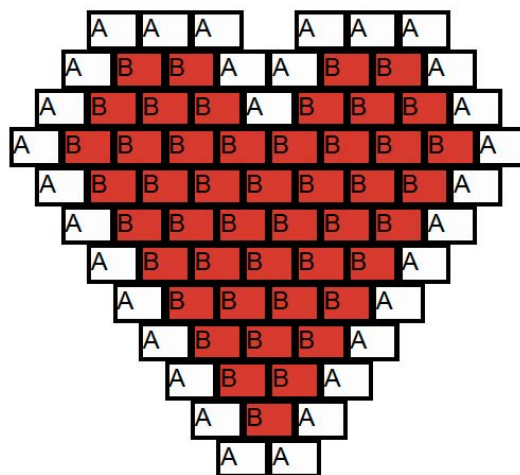

String with glass beads, crystals, and pearls for a stunning charm bracelet!

Step 1 - Make 6 in different colors

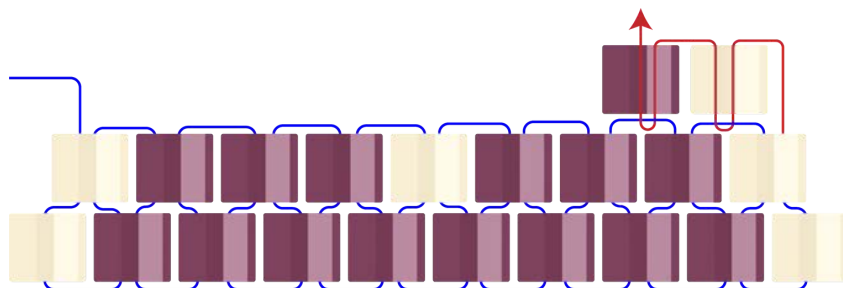

Cut 28-inches of beading thread. Select Color A and a Color B Miyuki Delica. Leaving a short tail, work the widest row and the row above it using single-column peyote. String (2)A and (1)B. Go back through the first A. String (1)B. Go back through the last B. Repeat this step to finish the widest row and the row above it.

Heart Charm

□ DB-200 ■ DB-723
Count:31 Count:46

Step 1

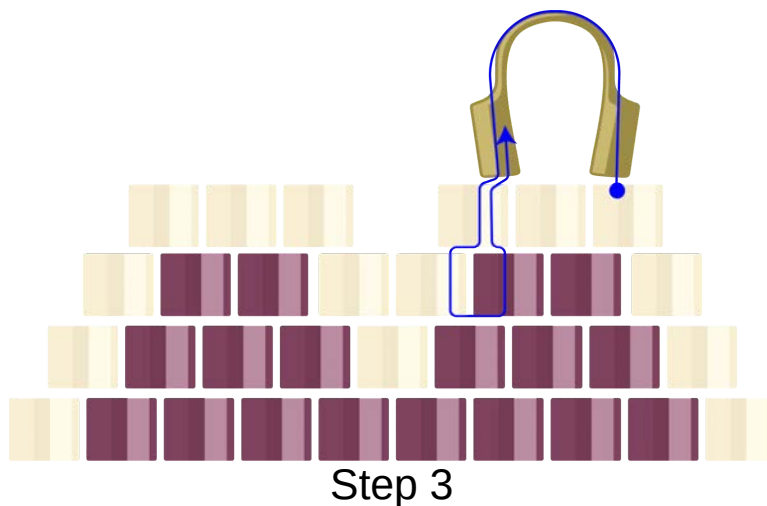

Step 2

Step 2

Using brick-stitch technique, work the rest of the pattern up from the peyote row.

Step 3

Stitch a wire guardian above the three top beads on one side. Reinforce, then weave to exit from the edgmost bead in the widest row.

Step 4

Finish the rest of the design using decreasing brick-stitch technique, working down from the widest row to the bottom of the heart. Weave in and trim remaining thread.

Step 5

Attach 4mm jump rings to the tops of the wire guardians for each heart. Working from the beading wire spool, string your design on the beading wire. The sample design starts with a 6mm pearl, then strings a pattern using the white delicas as spacers. The design alternates crystal with pearl and a matching crystal or glass bead to the color of the heart charm.

Step 6

Once you have your design, finish the free side with a 2x2 crimp bead and one side of your toggle. Cut the design free from the spool and finish the other side.

Enjoy your bracelet!
