## Assembly

- ☐ **Step 1:** Cut 6 pieces of yarn, each 10 inches long from the pumpkin yarn
- ☐ **Step 2:** Thread a piece of 10 inch yarn on the plastic tapestry needle. Thread the needle from the base of the pumpkin up to the base of the stem and pull until the center point of the yarn is at the stem. Weave the needle through the holes made by the decrease stitches at the base of the pumpkin.
- ☐ **Step 3:** Repeat Step 2 five more times
- ☐ **Step 4:** Holding the ends to a single 10" piece of yarn, tighten to sculpt the pumpkin indentations, then tie the ends into a knot at the base of the pumpkin.
- ☐ **Step 5:** Repeat Step 4 for the remaining 10" pieces of yarn, working opposite sides of the pumpkin for optimum sculpting results.
- ☐ **Step 6:** Weave in all ends
